

WHAT IS CLAIMED IS:

1. A house comprised of:
  - a plurality of modular units connected together;
  - a plurality of prefabricated molded exterior panels molded to replicate the look of a predetermined building material;
  - at least one prefabricated molded exterior panel having predetermined openings for a door to enter said house;
  - at least one prefabricated molded exterior panel form-molded with integral ornamental architectural features.
2. A house according to claim 1, wherein said molded exterior panel is a vacuum-pressed molded exterior panel.
3. A house according to claim 1, wherein said molded exterior panel is comprised of at least one layer of resin material in a grid like pattern.
4. A house according to claim 1, further comprising:
  - foam insulation injected into an area formed between said molded exterior panel and said frame structure.
5. A house according to claim 1, wherein said molded exterior panel is a unitary wall unit attached to one of said modular units.
6. A house according to claim 1, wherein said molded exterior panel is formed from an inert fire-resistant material.
7. A house according to claim 6, wherein said modular units are comprised of frames from steel members.

8. A house according to claim 1, wherein said ornamental architectural features are columns.
9. A house according to claim 1, wherein said ornamental architectural features are ornamental borders.
10. A house according to claim 1, further comprised of:
  - a modular roof frame connected to other said modular units.
11. A house according to claim 10, further comprised of:
  - a form-molded roof panel formed to replicate predetermined roofing material attached to said modular roof frame.
12. A house comprised of:
  - a plurality of modular units connected together;
  - a plurality of prefabricated molded exterior panels molded to replicate the look of a predetermined building material;
  - at least one prefabricated molded exterior panel having predetermined openings for a door to enter said house;
  - a modular roof frame connected to other said modular units; and
  - a form-molded roof panel formed to replicate predetermined roofing material attached to said modular roof frame.
13. A house according to claim 12, wherein said molded exterior panel is a vacuum-pressed molded exterior panel.
14. A house according to claim 12, wherein said molded exterior panel is comprised of at least one layer of resin material in a grid like pattern.

15. A house according to claim 12, further comprising:  
foam insulation injected into an area formed between said molded exterior panel and said frame structure.
16. A house according to claim 12, wherein said molded exterior panel is a unitary wall unit attached to one of said modular units.
17. A house according to claim 12, wherein said molded exterior panel is formed from an inert fire-resistant material.
18. A house according to claim 12, wherein said modular units are comprised of frames from steel members.
19. A house according to claim 12, wherein said ornamental architectural features are columns.
20. A house according to claim 12, wherein said ornamental architectural features are ornamental borders.
